About Me

Front-end-focused full-stack software developer with almost 2 years of industry experience. Also have experience in freelancing and contract-based work with a few agencies/indie devs. Achieved 622+ GitHub stars overall & engaged in small **Open Source Contributions** like [shadcn/ui](#) (PR) and others. I'm fluent in English, experienced in cross-team collaboration and client communication, and trying to build micro-SaaS, development tools, browser extensions, etc. Specialized in AI-driven workflows and agent-based development.

Skills

Front End : TypeScript, React, Next.js, Framer Motion, Tailwind CSS, Redux, Zustand, React Query

Back End : Node, Express, MongoDB, PostgreSQL, Socket.io, Firebase

Others : React Native/Expo, Turborepo, Vite, Git and GitHub, Docker, GitHub CI/CD, Figma, WXT.dev

Soft Skills : Debugging, communication, teamwork, leadership, and time management

Experience

Teachfosys

Software Developer

Remote

Jul 2025 - August 2026

- Integrated an AI-related API endpoint and collaborated with backend developers to ensure seamless API integration.
- Met with foreign clients, gathering information and requirements.
- Built and maintained applications and API endpoints.
- Completed 5+ client projects, optimized performance, and fixed bugs.
- Maintained **W3C** standards and addressed browser compatibility issues.
- Improved query caching and revalidation. Implemented quality of service and performance.

Neonency

Frontend Developer

Remote

December 2023 - September 2024

- Optimized frontend performance, reduced loading times, and improved the overall user experience.
- Ensuring websites are responsive and compatible with various devices and screen sizes.
- Fixed unnecessary re-rendering and client-side error handling, removed unnecessary packages with custom logic or more stable alternatives, and improved Lighthouse score by 10-20%.
- Optimized client projects to consistently achieve a Lighthouse score of 90+ whenever feasible

Projects

Glowmi.net

[Development Link](#) [Production Link](#)

AI-Powered Skincare E-Commerce for [Glowmi](#) (Under Development)

- Added i18n internationalization and support for both English LTR and Arabic RTL.
- Ensured a clean, maintainable, and scalable codebase.
- Built a full-featured e-commerce platform enabling seamless interaction between users and admin.
- Utilized AI-driven development and set up agent SKILLS, agent instructions & rules, and sub-agent configs for rapid development with proper efficiency and a structured codebase without compromising quality.

Port a vacation

[Live Link](#)

Vacation rental/property management website for a USA client

- Built a dynamic user search, filters, and detailed property pages.
- Focused on clean code structure, modular components, and scalable architecture.
- Collaborated with backend developers and did API integration.

Wiiz AI

[Live Link](#)

An AI-based job marketplace for a German client.

- Maintained a strict linting config and fixed all issues with Biome.js and other standard packages.
- Managed existing projects and fixed production bugs. Fixed over 50 minor or major noted issues.
- Designed mobile-first, responsive layouts, ensuring consistency across all devices.
- Maintained a clean, modular TypeScript codebase; containerized the application with Docker for future hosting with CI/CD.

Education

Govt. Bangla College

B.B.A. (Honors),

Dhaka, Bangladesh

October 2024 – Present
